WELCOME TO AGGIE ROBOTICS

Pictured: Aggie Robotics VEX U teams WHOOP & WHOOP8 after a fantastic run at the 2026 VEX U Robotics World Championship in St. Louis, Missouri.

Established in 2019, Aggie Robotics has become one of the largest student-led engineering project team organizations at Texas A&M University, uniting over 60 students in VEX U, Combat Robotics, and STEM outreach. Our flagship team, WHOOP, consistently performs among the top in the global VEX U competition, while our Combat Robotics team, WHOOP5, pushes the limits of design and manufacturing in high-intensity tournaments across Texas.

Beyond competing, we mentor the next generation of innovators by hosting the annual Aggeland Classic High School Robotics Tournament and volunteering at K-12 robotics events throughout the state of Texas. Sponsorship provides partners—whether industry leaders or local businesses—with visibility, access to top Aggie engineering talent, and a chance to make a lasting impact on the future of innovation and education. Continue through this packet to learn more about our project teams, recent achievements, community impact, and sponsorship opportunities.

OUR PROGRAMS AT A GLANCE

VEX U ROBOTICS

Our flagship VEX U team now unites the strengths of WHOOP and WHOOP8 into a single team representing Texas A&M University on the international stage. This combined program brings together WHOOP's veteran, world-ranked excellence with WHOOP8's bold, underclassmen-driven innovation in cutting-edge design and autonomous development.

Pictured: Team WHOOP 2025 setting a record climb!

Pictured: Team WHOOP's Robots 2026.

Together, these programs allow students to push the boundaries of engineering in one of the most competitive collegiate robotics platforms. Our members gain experience with advanced mechanical design using professional CAD software, software integration through Python and C++, and the development of autonomous systems. They also practice engineering documentation through judged design notebooks while coordinating operations with project management tools like Notion, giving them a skillset that mirrors the challenges of industry-level engineering projects.

COMBAT ROBOTICS

WHOOP5 is Aggie Robotics' Combat Robotics team, competing in tournaments across Houston and Dallas. These high-intensity battles challenge students to master machining, materials science, and durability testing as they design robots built to withstand destructive head-to-head matches.

The program also exposes members to advanced industry-relevant skills such as custom PCB design, 3D printing, electrical integration, and system modeling with software like Onshape and Altium Designer. Combat Robotics gives our members freedom to innovate outside of VEX U rules while developing resilience, creativity, and rapid problem-solving skills that carry directly into industry applications.

COMMUNITY IMPACT

THE AGGIELAND CLASSIC

Pictured: Aggieland Classic trophy lineup for 2026.

The Aggieland Classic has become one of the largest and most anticipated tournaments in the region, providing young competitors with a welcoming and high-energy environment. By supporting this event, sponsors not only help make the tournament possible but also gain visibility with hundreds of students, parents, and educators who attend each year.

Every year, Aggie Robotics organizes and hosts “The Aggieland Classic”, a premier robotics tournament that brings more than 30 middle and high school teams to Texas A&M University. The event offers students a chance to compete for a bid to the Texas State Championship while engaging with our members, who handle everything from setup and field reset to emceeing and judging.

VOLUNTEERING & DEMOS

Our members regularly contribute hundreds of hours each year volunteering at robotics competitions across Texas, especially in the Houston and Dallas areas. From field setup and technical support to refereeing and event coordination, Aggie Robotics helps ensure these competitions run smoothly while building a strong reputation as a reliable partner in the robotics community.

Beyond volunteering, we also conduct interactive demonstrations at local schools and community events, showcasing our competition robots and sparking curiosity in STEM among students of all ages. This dual commitment not only strengthens the Texas robotics community but also allows our students to develop leadership, communication, and organizational skills that extend far beyond the classroom.

SPONSORSHIP TIERS

BENEFITS BREAKDOWN

Partnering with Aggie Robotics connects sponsors with one of the largest and most competitive student engineering organizations at Texas A&M University. Your support helps us compete, mentor future STEM leaders, and expand outreach across Texas.

We are grateful for contributions at every tier, whether financial or in-kind donations like materials, components, or machinery that strengthen our design, build, and outreach efforts.

Sponsorship Benefits (Given Annually)	Bronze (\$250- \$999)	Silver (\$1000 - \$1999)	Gold** (\$2000 - \$3999)	Platinum** (\$4000 - \$7499)	Diamond** (\$7500+)

HOW TO SPONSOR:

1. Reach out to us at sponsorships@aggierobotics.com. Include your name, company, a PNG version of your logo, and the sponsorship tier you would like to join.
2. Our team will follow up promptly with next steps and provide any additional information you may need.

** For Diamond, Platinum, and Gold sponsorships, please contact our advisor Dr. Isuru Godage (igodage@tamu.edu) and sponsorships@aggierobotics.com to arrange a brief meeting where we can thank you personally and discuss the best ways to recognize your support.
